Universal Tool and Stamping
Company, Inc.
Box 67
Butler, Indiana 46721

Dear Mr. Ritenour:

Re: Disposal of Paint Wastes

You are hereby granted approval for disposal of one 55-gallon drum per month of paint wastes at the DeKalb County Landfill, #17-1.

This waste should be mixed with general refuse and all refuse covered with six inches of soil at the end of the working day. This material should not be disposed of during inclement weather. The landfill should be notified prior to delivery of this material for disposal. Any necessary local approval must be obtained from the DeKalb County Health Department.

If you have any questions, please contact Mr. Ken Verma or Mr. Guinn Doyle of our Solid Waste Section at 317/633-0176.

Very truly yours,

Oral H. Hert

State Board of Health
1330 West Michigan Street
Indianapolis, IN 46206

Attn: David D. Lamm, Acting Chief
Solid Wastes Management Section
Division of Sanitary Engineering

Dear Mr. Lamm:

With reference to disposal of defective paint.

We use air dried solvent base enamels and air dried water base enamels for our painting operation on automotive bumper jacks. This is a dip operation and as I have said, air dried.

Periodically our dip tanks turn rancid or become so saturated with soil that they need to be disposed of. We probably might accumulate a drum per month of this type of material.

We would request approval to forward this for disposal to Midwest Industrial Waste Disposal Company, Gary, Indiana. We would further request the approval to haul this material on our own truck as it would be returned in 55-gallon metal closed containers and we do have hauling facilities for this type.

Respectfully,

UNIVERSAL TOOL & STAMPING CO., INC.
